

## **Budowa Optycznej Sieci Teleinformatycznej Opola (OSTO)**

### Building the Optical Teleinformatics Network of Opole

Implementation of the project is conditional on financial support of EU funds.

(We are planning to co-finance the project from Regional Operational Programme for Opolskie Voivodeship for years 2007 – 2013)

***Leader of the project:*** Opole University

***The partners of the project:***

- City Office of Opole
- Opole University of Technology

***The project location:*** Opole

***Aims of the project:***

- Implementation of the information society initiative
- Increase accessibility to high speed Internet in Opole

***Implementation of the project:***

First stage - build a fibreoptic cable network 20 km in length covering the centre of the city

Next stages – extend the network to cover the whole city

***Intended Results:***

- Provide a high speed access to Internet for public institutions and citizens of Opole
- Improvement of the competitiveness of Opole Region in the field of informatics technology
